Title Index 1962*

EARTH SCIENCES

The Continent's Submerged Edge, †December

U. S. Participation in the International Indian Ocean Expedition, †August

Scientific Excursion to the Arctic by Louis O. Quam, February

A search for the Mohole Drilling Site by M.C. Sargent, November

MATERIAL SCIENCES

Basic Research in Inorganic Polymers by Harry Fleisher, June

Tropical Woods: Key to Studies of Wood Properties by Frederick F. Wangaard, May

PHYSICAL SCIENCES

Bioelectronics at M.I.T. by A. Shostak and E. Appleton, October

ICEF Experiment Successfully Flown by LCDR John A. Wamsley, USN, January

New Telescopes Begin Survey of Milky Way, †July

Radio Astronomy at the Universities by E. H. Hurlburt and A. Shostak, September

Skyhook's Fort Churchill Launchings - 1962, LCDR J. A. Wamsley, June

36-Inch Telescope to View Planets from Stratosphere, †October

MATHEMATICAL SCIENCES

Discipline and Practice of Operations Research by Thomas L. Saaty, January

BIOLOGICAL SCIENCES

Biodigmatics, †September

Biological Orientation by S. R. Galler and H. Hayes, September

The Future of Tissue Transplantation by Joseph F. Saunders, Ph.D., May

Life Without Germs, †October

The Navy's Research Program in Hydrobiology, †August

ONR Research in the Biological Sciences by Roger D. Reid, April

Research on Physiological Stress by L. M. Libber, November

A Study of Frostbite Treatment by William J. Mills, Jr., M.D., March

Underwater TV and Hydrophones Placed in Gulf Stream, †November

PSYCHOLOGICAL SCIENCES

"Pilot Error," Richard Trumbull, June

A Study of the Effects of Vibration on Human Performance by J. E. Beaupeurt, August

*Articles are arranged under the ONR division or laboratory having Cognizance of the research described.

†Written by the editorial staff of Naval Research Reviews or adapted from anonymous sources.

NAVAL APPLICATIONS

"Airoll": A Superior System of Vehicle Locomotion, Kenneth E. Breisch, July

Giant Manned Buoy Brings Stability to Deep-Ocean Research, †August

Project Wetfoot, LCDR William S. M. Arnold, USN, July

The Second Generation of Ground Effect Machines by CAPT R. J. Trauger, September

LABORATORIES OF ONR

Brain-Wave Modification by Flicker, Willard D. Dahl, June

FORDS (Floating Ocean Research and Development Station by R. E. Faries, December

Experiments with Algae for Submarine Air Purification, P. J. Hannan, July

Measurements of Fission Debris from Recent Soviet Explosions by L. B. Lockhart, Jr., April

A New Method for Obliterating Danagerous Aneurysms of the Brain, John P. Gallagher, M.D., August

A New Variable in Underwater Explosions by E. A. Schuert, March

Shelter Design and Habitability Study, †April

Space Radiation and Communication Satellites by E. Tochilin, February

Training Simulators at NTDC, †June

MISCELLANEOUS

The Bathyscaph as an Acoustic Vehicle by LT Don Walsh, USN, April

Center of Naval Analyses, † September

Controlled Experiment in the Removal of Ticks, † February

Electronics Research, † December

Enlarging an Oceanographic Research Tower by E. C. LaFond, May

The French Navy's Underwater Sound Laboratory by M. P. Foache, March

The Naval Civil Engineering Laboratory, †March

Naval Research in Canada by J. R. Longard and W. H. Dingle, May

Navigation and Leveling at Sea by William S. von Arx, January

New Laboratory . . . Famous Old Astronomer, †April

A New Signaling Beacon by S. Feldman and T. I. Monahan, February

Radiation Shielding Studies at the Naval Civil Engineering Laboratory by H. E. Stanton, November

Short Refresher Course on Navy Missiles, †April

The "Thousand" Aviators—23 Years Later by CDR R.E. Mitchell, December

Tsunami by B. J. Cagle, February

USL's Undersea Warfare Research Building, † November

---
